

Innovation has a name

***** Too small for a normal mechanical manufacturing process? *****

***** Repeated high volume, requirements every year? *****

***** High demands on strength and tolerances? *****

microMIM by Parmaco → The solution

- Weight of part: 0.01 bis 0.3 Gramm
- Tolerances: a range of 0.01 mm possible
- Material: Steel and other alloys
- Volumes: from 250'000 to millions per year

We produce with our Metal Injection Molding process Miniparts, Miniatureparts or Microparts.
