

## For the protection of police and population

### Field of Application:

Basically, this product is to be used in a firearm which is not life-threatening. It is in fact a so-called pepper spray weapon, intended to incapacitate offenders and thus avoid unnecessary risks for both parties. With its help, police forces or security services can neutralize attackers and take them into custody without injuring them.

### MIM Components:

In order to avoid any unnecessary risks for the parties involved, these devices must possess the highest degree in functional reliability. For this reason, only the highest-quality and thus most reliable MIM components are used.

### MIM Material:

For this product, the steel Parmaco 7%NiFe is used, and subsequently case-hardened to 60 HRC.

### Part Specifications:

- Material: 7%NiFe
- Weight: 1 = 13.90g / 2 = 18.35g / 3 = 6.88g
- Surface Roughness: Ra 1.2
- Annual quantity: 10'000 pieces each
- Post-processing: machined, case-hardened, and chromed
